Charles Dickens (1812 - 1870) The story is told almost entirely from the point of view of the first person narrator, David Copperfield himself, and was the first Dickens novel to be written as such a narration. The story deals with the life of David Copperfield from childhood to maturity. David's father had died six months before he was born, and seven years later, his mother remarries but David and his step-father don¢ÂÂt get on and he is sent to boarding school. As David settles into life we are taken along with him and meet a dazzling array of characters, some of whom we will never forget and some of whom we won't want to remember! (Introduction by Wikipedia & T.Hynes) Genre(s): General Fiction, Literary Fiction Language: English Authors Books Genres Collections Readability David Copperfield is a novel by Charles Dickens. Like many works by Dickens, David Copperfield was published in series, so as a complete novel for the first time in 1850. Dickens himself thought how his favorite novel, writing in preface that of all his works Copperfield was his own Favorite child. This is not surprising, considering that many of the events of the novel are semi-autobiographical reports of Dickens' life. To David Copperfield we follow the life of the titular person while doing a life in England. He finds himself in the care of a cold stepfather who sends him to the college and from there a journey full of characters and events that can only be called "Dickensians" in their colorful and just pleasant portraits.
